

Minisoft Announces Windows 8 and Apple OSX “Mountain Lion” Support for its Terminal Emulation Products!

Terminal Emulation Connectivity Products are now compatible with Windows 8 and Apple OSX Operating Systems

SNOHOMISH, Wash. —January 31, 2013—Minisoft Inc., a leading provider of forms generation, transactional email and legacy connectivity solutions, is pleased to announce the release a special 2-user version of its Javelin HP700/92 Terminal Emulator for use with the Stromasys CHARON Freeware Edition which allows a 2-user instance of the MPE operating system to run on Intel platforms.

The cost of this special 2-user version of Javelin is \$49. In addition to HP 700/92 terminal emulation, Minisoft Terminal Emulation products support access to legacy host computer systems offering precise emulation of IBM 3270, IBM 5250, and DIGITAL VT320/420 terminals. All Minisoft Terminal Emulators include scripting, SSH/SSL Connectivity and network file transfer. Minisoft Terminal Emulation products run on Windows, Windows Mobile, Apple, and Linux. Customers that have a current support contract for the products listed above may download an update of these products from the Minisoft website at no extra charge.
