

Minisoft Introduces New ePreview Application for QAD!

Minisoft's ePreview Allows QAD Users to Render Forms to their Desktops for Preview and Processing

SNOHOMISH, Wash. —April 23, 2013—Minisoft Inc., a leading provider of forms generation, transactional email, CRM and legacy connectivity solutions, is pleased to announce the release of ePreview, a new application that displays archived forms to a user's desktop for preview.

In response to requests from Minisoft's QAD customers, forms built with Minisoft's eFORMz can now be rendered to a user's desktop for preview using ePreview. Minisoft's ePreview application displays forms from an archive in an attractive dashboard, which can be deployed in a standard web browser or using Minisoft's eReader content viewer. Once rendered to the screen, output can be reviewed before printing or emailing.

Minisoft will be demonstrating ePreview at QAD Explore, May 6-8, 2013 in San Antonio, Texas. Visit booth #208 to learn more.
